

SOLA

SOLA TECHNICAL FEATURES

SNAP DRY Lining
Allows for a quicker drying time.

DOUBLE DIAMOND
Durable, double knit nylon fabric protects high-wear areas.

MESH SKIN
Chest and back panels. Increases the warmth of the suit and helps to reduce wind-chill.

GLUED & BLIND STITCHED
Strong, durable and watertight construction.

ULTRALIGHT
Super light neoprene for added warmth and flexibility. Improved insulation.

FRONT ZIP
Front entry system. YKK zip.

FLATLOCKED
Flat and comfortable construction.

4WAY SUPER STRETCH
Highly flexible neoprene. Improves movement.

BACKZIP
Back entry system. YKK zip.

LIQUID TAPE
100% Waterproof. Seams are sealed with liquid rubber.

FOCUSSED NEO TAPING
Flexible spot taping in strategic areas for extra strength.

NEO TAPING
Flexible taping along seams for added strength. Limits water penetration and increases warmth.

TOP VIEW

SIDE VIEW

Glued & Blind Stitched (GBS)- A blind stitch uses a curved needle and penetrates the neoprene only partway through. Since the holes are only partial, this stitch provides the best cold water protection and is the industry standard. Most blind stitches are reinforced with tape and/or glue for extra durability and water protection.

TOP VIEW

SIDE VIEW

Flatlock - A more durable stitch used in most summer wetsuits. Triple needles penetrate and bind layers of neoprene together providing a strong but flat stitch for comfort and strength. Not as water tight as blind stitching, but very hardwearing.

The neoprene used in SOLA wetsuits varies in thickness. Measured in millimeters as indicated by these icons. The basic rule is, the colder the water, the thicker the neoprene.
